... mer än 98 % av den svenska befolkningen har brist på vitamin D3.

<https://kostkunskap.blogg.se/2020/april/livsmedelsverket-bryter-mot-lag.html>

Dr Mercola har publicerat 2020-09-22 en mycket viktig artikel, citerar lösryckta delar ur artikeln, citat

Vaccination: What's Trust Got to Do With It?

- The orchestrated actions by governments around the world to restrict or eliminate civil liberties in response to the COVID-19 pandemic has been unprecedented, and has had profound effects on the global economy and on the physical, mental and emotional health of billions of people
- By mid-September 2020, the U.S. had recorded over 7 million cases and 198,000 deaths, with an estimated 598 deaths per million people — a higher death rate per million people than Sweden, where health officials refused to order masking or to lock down the country and allowed the population to acquire natural herd immunity
- According to the World Health Organization, the overall infection mortality rate for COVID-19 is about 0.6%
- The CDC recently reported that only 6% of COVID-19-related deaths were solely due to coronavirus infection **and 94% of the people who died also had influenza or pneumonia; heart, lung or kidney disease; high blood pressure; diabetes; or another underlying poor health condition**
- Governments have given pharmaceutical companies a liability shield from lawsuits when COVID-19 vaccines injure or kill people. **Every poll taken this year has revealed that between 40% and 70% of people living in the U.S. and Europe do not plan to get a COVID-19 vaccine when it is licensed**

Overall COVID-19 Mortality Is Less Than 1%

According to the World Health Organization, the overall infection mortality rate for the new SARS coronavirus causing COVID-19 is about 0.6%,⁵ although some scientists say it is lower,⁶ while others estimate it can be as high as 1 to 2% in some parts of the world.⁷

Compared to Ebola with a 50% mortality rate⁸ or smallpox that killed 30%,⁹ or tuberculosis that still is a deadly disease killing 20% to 70%,¹⁰ or diphtheria at 5% to 10%,¹¹ or the 1918 influenza pandemic with a 2.5% mortality rate,¹² COVID-19 is near the bottom of the infectious diseases mortality scale with a less than 1% mortality rate in most countries.

People in US and Other Nations Rise to Defend Freedom

This summer, huge public demonstrations defending freedom in Berlin,¹⁰⁶ London,¹⁰⁷ Paris¹⁰⁸ and Copenhagen saw tens of thousands of citizens gather to protest masking¹⁰⁹ and other oppressive coronavirus lockdown policies, which have severely restricted normal physical contact between people, caused widespread unemployment,¹¹⁰ and harmed their physical, mental and emotional health.¹¹¹

Like in Europe, people living in Canada,¹¹² Australia^{113,114} and New Zealand¹¹⁵ also are resisting months of social distancing policies that have eliminated fundamental human rights, such as freedom of speech and assembly.

Who controls the British Government response to Covid-19?

Part One

The Global Vaccine Action Plan (GVAP) 2012–2020, endorsed by the 194 member states participating in the World Health Assembly (2012), is led by the same members of the Gates "vaccine decade" consortium, **promoted by the WHO**, and brings together governments, elected officials, health professionals, academia, manufacturers, global agencies, research and development, civil society, media and the private sector — to promote global immunisation. This is a profit-driven corporate complex harnessing the "humanitarian" sector to lend credence to the claims of philanthropy, or more realistically, philanthrocapitalism.

In part two, I will delve deeper into the interlocking interests of state and private corporate sectors that should not be interfering in policies which affect the welfare of British citizens. I will reveal how the same players are influencing the media response and ensuring that their interests are given the most powerful platforms to promote their agenda.

The questions must be asked: Who is really in charge of the Covid–19 response? Who benefits most? Who will suffer most from the long term consequences? And who will provide respite from those consequences when the "pandemic" has disappeared from view?

COVID–19: The Big Pharma players behind UK Government lockdown

Part 2 of 'Who controls the British Government response to Covid–19?'

"To achieve world government, it is necessary to remove from the minds of men their individualism, loyalty to family tradition, national patriotism, and religious dogmas."

— Dr George Brock Chisholm, who served as the first Director-General of the World Health Organisation (WHO) from 1948 to 1953

The Big Pharma monopoly dictating the “new normal” in global healthcare

Who are CEPI? CEPI is the Coalition for Epidemic Preparedness Innovations. CEPI was [launched](#) at Davos in 2017 by the governments of Norway and India, the Bill & Melinda Gates Foundation, the British-based Wellcome Trust global health “charity”, and the World Economic Forum. CEPI is described as an “innovative partnership between public, private, philanthropic and civil organisations”, to which I would add governments: the coalition has received investment from the governments of Germany, Japan, Australia, the UK, Belgium and Canada. Their primary [role](#) in relation to Covid–19 is the “development of platforms that can be used for rapid vaccine development against unknown pathogens” (2018).

Historian and author Prof. [Michel Chossudovsky](#) is convinced that CEPI is “seeking a monopoly role in the vaccination business, the objective of which is a global vaccine project”. As I have previously reported, CEPI is key to the success of the Gates “vaccine decade” project, which reaches its conclusion in 2020 — coinciding with the outbreak of Covid–19. CEPI brings together the main players in biotechnology, Big Pharma and associated global health charities, governmental agencies, and university R&D to drive us towards global immunisation.

CEPI’s euphemistically named “wider community” is represented by five non-voting members or observers; these include the World Bank, which is the principal financial

institution holding CEPI funds, and a representative from the WHO. Every governing body or complex that is promoting global immunisation registers the same entities as influencers and sponsors. **Again and again, the conflict of interest question must be raised in relation to the Covid–19 response.**

Covid–19 is pushing us towards global health fascism

The WHO is effectively a self-regulatory entity in charge of world health but with little public accountability, particularly where vaccines are concerned. The [Global Advisory Committee on Vaccine Safety](#) (GACVS) was established by the WHO in 1999 to respond to vaccine safety issues of “potential global importance”.

Bill Gates is [demanding indemnity](#) against lawsuits before he agrees to distribute vaccines. We are all being fast-tracked into a future where our medical self-determination is in serious jeopardy and where those who decide for us will, potentially, not be held accountable for any health-endangering side effects.

We have already seen the devastating consequences of mass immunisation during the H1N1 epidemic, with questionable Big Pharma transparency regarding risk, as found by those who were given a vaccination that left them brain damaged for life.

The H1N1 vaccine travesty must serve as a warning against precipitous vaccine development motivated by lockdown cabin fever, when the lockdown itself is looking more and more likely to be orchestrated to achieve precisely this outcome.

At the same time, as the possibility of compulsory vaccination is under discussion, the government intends to roll out a surveillance apparatus that will ensure forever-control over an already politically weakened workforce pushed ever deeper into financial insecurity, first by austerity measures and now by Covid–19.

It is very important to push back against the emotional triggering that is being generated by the state-aligned media and agencies.

The behavioural insight experts are working hard to nudge us towards dependency on the state — but we must not surrender our individual and collective independence. We must determine the drivers behind this “crisis”, identify the causes, and deal with the symptoms without succumbing to fear or panic.

It is not easy; but our futures depend upon our ability to see what is really going on and to respond accordingly.

Boris Johnson to announce 10pm curfew for pubs and restaurants in England

Boris Johnson is set to slap all pubs, bars and restaurants in England with a 10pm curfew in a bid to tackle the soaring number of Covid-19 cases.

The Tory Prime Minister will address announce the new rules during a live, televised address at 8pm on Tuesday night.

He is expected to announce more restrictive measures for the hospitality industry who, by law, will only be allowed to provide table service during limited trading hours.

The new rules are being guided by scientific advice and will be announced following an emergency Cobra meeting with the other UK leaders.

The Record earlier told how a leaked Scottish government paper detailed 16 restriction options which were being considered to curb the rising number of cases in Scotland.
